

## **Training Title**

# PIPELINES: DESIGN, INSPECTION & TESTING

## **Training Duration**

5 days

**Training Venue and Dates** 

REF			14–18 March,		
ME047	Pipeline: Design Inspection & Testing	5	2021	\$4,500	Dubai, UAE

In any of the 5 star hotels. The exact venue will be informed once finalized.

#### **Training Fees**

• 4,500 US\$ per participant for Public Training includes Materials/Handouts, tea/coffee breaks, refreshments & Buffet Lunch

#### TRAINING DESCRIPTION

The course will review the basic requirements of the ASME B31 Code for Pressure Piping. Topics include: design conditions, pipe sizing, pressure design, flexibility analysis, material, fabrication, examination, testing, and mechanical integrity for existing piping systems, as provided in API 570 Piping Inspection Code.

#### TRAINING OBJECTIVES:

- To provide the participant with a complete and up-to-date overview of the area of Piping Technology
- The participant will learn the design, fabrication, examination and testing requirements of ASME B31
- Familiarizing the participant with the related standards for inspection and repair of piping systems that have been in service, as provided in API 570, Piping Inspection Code
- The participant will gain a deep understanding of the physical phenomena which affect the operation, durability of piping systems
- Participant will learn to calculate the pipe schedule, and pipe size that serve certain application
- Participant will learn different methods of pipe inspection and testing based on related Codes and Standards
- Participant will be exposed to different method of checking pipe flexibility

#### WHO SHOULD ATTEND

Engineers and Technicians of mechanical, and chemical engineering background will benefit largely from this workshop. Maintenance, Operation, inspection, and R and D People should also attend this course.

DMCT/OL/9/18(Rev3Dt:23/9/18)

P.O BOX 45304 ABU DHABI, U.A.E

### TRAINING METHODOLOGY:

A highly interactive combination of lectures and discussion sessions will be managed to maximize the amount and quality of information and knowledge transfer. The sessions will start by raising the most relevant questions, and motivate everybody find the right answers. You will also be encouraged to raise your own questions and to share in the development of the right answers using your own analysis and experiences. Tests of multiple-choice type will be made available on daily basis to examine the effectiveness of delivering the course. All presentations are made in excellent colorful power point. Very useful Course Materials will be given.

- 30% Lectures
- 30% Workshops and work presentation
- 20% Group Work& Practical Exercises
- 20% Videos& General Discussions

### **COURSE OUTLINE: -**

The Following Topics will be covered in this course over five days

Basics of Piping
Pipe Dimensions and Schedule number
Pipe Manufacturing Methods
Welded and Seamless Pipes
Pipe Drawing Symbols
Types of pipes – application wise
Standard pipe
Pressure pipe
Line pipe

Piping Materials
Chemical properties
Www.definetraining.com
Mechanical properties
Physical properties
Property stability
Classification of steel
Steel heat treating practices
Aging of properties

Piping Codes and Standards ASME Boiler and Pressure Vessel Code ASME B31: Code for pressure piping

DMCT/OL/9/18(Rev3Dt:23/9/18)

P.O BOX 45304 ABU DHABI, U.A.E

API Specifications (Spec), Recommended Practices (RP), and Standards (Std.) Spec. 5L-90: Specification for Line Pipe American Welding Society - AWS Welding Handbook

Pipeline Design

1. Design Parameters

**Maximum Operating Pressure** 

Flow Rate of Oil or Gas

**Delivery Pressure** 

**Pressure Drop** 

**Pumping Power** 

- 2. Failure Theories
- 3. Design Criteria

**Maximum Allowable Stress** 

**Maximum Allowable Pressure** 

**Construction Factor** 

- 4. Steel Selection
- 5. Pipe Sizing

Pipe Diameter

6. Pipe thickness calculation

Pipe Schedule

Pump and Compressor Stations
Originating and booster Stations
Pump Selection
Parallel and Series Operation

Pipeline Installation
Off-shore and on-shore installations

Welding Techniques Welding Processes Welding Procedures Weld Passes

P.O BOX 45304 ABU DHABI, U.A.E

Pigging for Cleaning and Monitoring Types of Pigs Monitoring Internal Corrosion Pipe Repair

Buried pipelines Corrosion and Cathodic Protection Pipe Coating

Stress Analysis
Flexibility Analysis Methods
Flexibility Analysis Demonstration
Equipment Load Limits
Cold Spring
Elastic Follow-up
Fluid Service Requirements

#### **NOTE:**

Pre & Post Tests will be conducted

Case Studies, Group Exercises, Group Discussions, Last Day Review & Assessments will

be carried out.
