TRAINING DESCRIPTION

The course aims to provide guidance and practical experience in planning, executing, implementing, and reporting Integrated Audits, on all standards AT ONE TIME, in every audit lifecycle.

Most of the organizations which have implemented these standards independently, is definitely a challenge for maintenance and audits. There are some commonalities and unique aspects in all domain standards. Auditing these independently involve time consuming and at times leading to confusions in cascading effects of processes, risk assessments and corrective actions. Since Risk management is involved in the processes of Finance & Cost Management System, Quality Management System, Environment Management System,, Health & Safety Management System, Information Security Management, Food Safety Management, and Energy Management auditing requires different competencies.

COURSE OBJECTIVES

Integrated audits of management systems will have both common elements having similar requirements and system specific elements having unique requirements, which need specific skills. This program shall develop required competencies and skills for the same by providing the required Knowledge.

DMCT/OL/9/18(Rev3Dt:23/9/18)

Benefits to your business

- Cost-savings from Elimination of Duplicative Work
- Reduction of Audit time in doing individual Audits
- Reduction of Complexity in understanding
- Better Cohesiveness and Consistency
- More focused & better-tuned Business 'Engine'
- Common visible framework for managing business and risks
- Management & Customer confidence
