TRAINING OVERVIEW

Business Continuity is a cornerstone for many organizations today, not only in ensuring business survival, but also as a means to identify critical processes, infrastructure and personnel that enable the organization to meet its core mission. The benefits of a BCM project go far beyond continuity in that they often include assurance of compliance with regulatory mandates, customer and supplier confidence, and easier access to credit and insurance through demonstrating emergency preparedness and stability.

The development of proven and reliable methodologies enables an organization to execute and maintain an executive business continuity program.

TRAINING OBJECTIVE

This course is a valuable tool in understanding the processes and practical steps to follow when establishing a BCM program. Taking the candidates through the phases of Business Continuity Management in a logical, understandable manner, this course will ensure that each attendee is familiar with the objectives of each phase and prepared to lead or assist their organization's BCM project team.

TRAINING PREREQUISITE

This course is designed to meet the needs of Business Continuity Professionals at any stage in their careers. The beginner benefits from a solid description of the methodology whereas the experienced professional gains a complete understanding of the leading developments in business continuity management and the opportunity to learn with fellow BCM professionals.

DMCT/OL/9/18(Rev3Dt:23/9/18)
