

Training Title

REFINING PROCESSES AND PETROLEUM PRODUCTS

Training Duration

5 days

Training Venue and Dates

REF RT011	Refining Processes And Petroleum Products	5	19-23 March	\$4,250	Dubai, UAE
--------------	--	---	-------------	---------	------------

In any of the 5 star hotel. Exact venue will be informed later.

Training Fees

- 4,250 US\$ per participant includes Training Materials/Handouts, Tea/Coffee breaks, Refreshments and International Buffet Lunch.

Training Certificate

Define Management Consultancy & Training Certificate of course completion will be issued to all attendees.

TRAINING OBJECTIVES

Upon completion of this course, participants will have an understanding of the overall process operation of an integrated petroleum refinery and the extensive vocabulary unique to this industry.

Participants will also have gained knowledge of crude oil properties and fuel product specifications; and the environmental pressures on the oil industry; the results of these pressures on fuel specifications; and the changes demanded of the oil industry

WHO SHOULD ATTEND

This program is designed for those who have refinery-operating experience or who are involved in supporting operations. New refinery engineers, product sales personnel, fuel buyers, oil-traders, those involved in economic assessment of refining operations or financial analysis of sales / refining. In addition personnel concerned with the sale of equipment, chemicals, supplies, or services to the refining industry should benefit from this course.

Experienced operating personnel and engineering staff should find a great deal of beneficial information, particularly if they have worked in only one area of the refinery and have the need to gain an overview of refining operations

TRAINING METHODOLOGY:

A highly interactive combination of lectures and discussion sessions will be managed to maximize the amount and quality of information and knowledge transfer. The sessions will start by raising the

most relevant questions, and motivate everybody find the right answers. You will also be encouraged to raise your own questions and to share in the development of the right answers using your own analysis and experiences. Tests of multiple-choice type will be made available on daily basis to examine the effectiveness of delivering the course.

Very useful Course Materials will be given.

- 30% Lectures
- 30% Workshops and work presentation
- 20% Group Work & Practical Exercises
- 20% Videos & General Discussions

COURSE OUTLINE

First Day

Introduction

The Origins of Petroleum

Crude oil Assay and its properties

Crude oil products

Effect on refinery operations

Refinery Terminology

Overview of the petroleum industry

Second Day

Description of petroleum refining processes and related health and safety considerations

Simple and complex refineries

Refinery flow sheet signs and symbols

Crude oil processing

Desalting

Atmospheric distillation

Vacuum distillation

Distillation - pressure, steam

Hydro treating Hydrodesulphurization

Third Day

- ☐ Catalytic cracking
- ☐ Platforming
- ☐ Visbraking
- ☐ Hydrocracking
- ☐ Alkylation
- ☐ Bitumen blowing Gas Treating

Fourth Day

Product Slate – Now and Future:

Products and specifications

www.definettraining.com

Gasoline
Kerosene/Jet Fuel
Fuel Oil/Diesel Fuels
Petrochemical Feedstocks
Alternative Fuels

Effects of Environmental concerns on oil product specifications
Gasoline & Lead phase out
Reformulated Gasoline
Blending of products

Fifth Day
Tanks and Storage
Product Transfer
Utilities

Case studies and discussion Will be carried out

www.definettraining.com
