TRAINING OVERVIEW

TRAINING DESCRIPTION

“Transportation activities do not only impact fulfillment systems and delivery times but often constitute a large chunk of logistics costs incurred by any company. The timely distribution of goods and services as well as a well-designed transportation network are essential to the success of any enterprise. The Transportation Management Best Practices course offers its attendees the knowledge and skills necessary to effectively plan, manage and control all transportation activities carried out by their companies.

TRAINING OBJECTIVES

Audience who has completed the course will:

- Have extensive knowledge of the world of transportation.
- Be familiar with most of the terminologies used in transportation.
- Be familiar with most common transportation modes and transportation services.
- Learn fundamental transportation costing and pricing techniques.
- Be able to determine which transport modes and services best fit their companies.
- Be able to assess the transportation needs of their companies in terms of vehicles and equipment.
- Be familiar with essential concepts and techniques of route planning and scheduling.

DMCT/OL/9/18(Rev3Dt:23/9/18)

- Be familiar with available systems for effective transportation management.

WHO SHOULD ATTEND?

This course is directed to personnel with average knowledge or no knowledge of transportation management concepts. The information presented proved very beneficial to Transportation Managers, Distribution Managers, Transportation Planners, Dispatchers, etc.

TRAINING METHODOLOGY

A highly interactive combination of lecture and discussion sessions will be managed to maximize the amount and quality of information, knowledge and experience transfer. The sessions will start by raising the most relevant questions, and motivate everybody finding the right answers. The attendants will also be encouraged to raise more of their own questions and to share developing the right answers using their own analysis and experience. All attendees receive a course manual as a reference.

This interactive training workshop includes the following training methodologies

30% Lectures

30% Workshops and work presentation

20% Group Work & Practical Exercises

20% Videos & General Discussions
