

**Training Title**

**PIPELINES: DESIGN, INSPECTION & TESTING**

**Training Duration**

5 days

**Training Venue and Dates**

REF			16 – 20 June		
ME047	Pipeline: Design Inspection & Testing	5	2025	\$5,500	Dubai, UAE

In any of the 4 or 5-star hotels. The exact venue will be informed once finalized.

**Certification**

Define Management Consultancy & Training Certificate of course completion will be issued to all attendees.

**Training Fees**

- \$5,500 per participant for Public Training includes Materials/Handouts, tea/coffee breaks, refreshments & Lunch

**TRAINING DESCRIPTION**

The course will review the basic requirements of the ASME B31 Code for Pressure Piping. Topics include design conditions, pipe sizing, pressure design, flexibility analysis, material, fabrication, examination, testing, and mechanical integrity for existing piping systems, as provided in the API 570 Piping Inspection Code.

**TRAINING OBJECTIVES:**

- To provide the participant with a complete and up-to-date overview of the area of Piping Technology
- The participant will learn the design, fabrication, examination, and testing requirements of ASME B31
- Familiarizing the participant with the related standards for inspection and repair of piping systems that have been in service, as provided in API 570, Piping Inspection Code
- The participant will gain a deep understanding of the physical phenomena that affect the operation and durability of piping systems.
- Participants will learn to calculate the pipe schedule, and pipe size that serve certain applications.
- Participants will learn different methods of pipe inspection and testing based on related Codes and Standards
- Participants will be exposed to different methods of checking pipe flexibility.

DMCT/OL/9/18(Rev3Dt:23/9/18)

### WHO SHOULD ATTEND

Engineers and Technicians of mechanical and chemical engineering backgrounds will benefit largely from this workshop. Maintenance, Operation, inspection, and R and D People should also attend this course.

### TRAINING METHODOLOGY:

A highly interactive combination of lectures and discussion sessions will be managed to maximize the amount and quality of information and knowledge transfer. The sessions will start by raising the most relevant questions and motivating everybody to find the right answers. You will also be encouraged to raise your questions and to share in the development of the right answers using your analysis and experiences. Tests of multiple-choice type will be made available daily to examine the effectiveness of delivering the course.

All presentations are made in excellent colorful PowerPoint. Very useful Course Materials will be given.

- 30% Lectures
- 30% Workshops and work presentation
- 20% Group Work & Practical Exercises
- 20% Videos & General Discussions

### COURSE OUTLINE: -

The Following Topics will be covered in this course over five days.

#### Basics of Piping

Pipe Dimensions and Schedule number

Pipe Manufacturing Methods

Welded and Seamless Pipes

Pipe Drawing Symbols

Types of pipes – application-wise

Standard pipe

Pressure pipe

Line pipe

#### Piping Materials

Chemical properties

Mechanical properties

Physical properties

Property stability

Classification of steel

DMCT/OL/9/18(Rev3Dt:23/9/18)

**Steel heat treating practices.**  
**Aging of properties**

**Piping Codes and Standards**

**ASME Boiler and Pressure Vessel Code**

**ASME B31: Code for pressure piping**

**API Specifications (Spec), Recommended Practices (RP), and Standards (Std.)**

**Spec. 5L-90: Specification for Line Pipe**

**American Welding Society - AWS Welding Handbook**

**Pipeline Design**

**1. Design Parameters**

**Maximum Operating Pressure**

**Flow Rate of Oil or Gas**

**Delivery Pressure**

**Pressure Drop**

**Pumping Power**

**2. Failure Theories**

**3. Design Criteria**

**Maximum Allowable Stress**

**Maximum Allowable Pressure**

**Construction Factor**

**4. Steel Selection**

**5. Pipe Sizing**

**Pipe Diameter**

**6. Pipe thickness calculation**

**Pipe Schedule**

**Pump and Compressor Stations**

**Originating and booster Stations**

**Pump Selection**

**Parallel and Series Operation**

**Pipeline Installation**

**Off-shore and on-shore installations**

**Welding Techniques**

**Welding Processes**

**Welding Procedures**

**Weld Passes**

*DMCT/OL/9/18(Rev3Dt:23/9/18)*

**Inspection and Testing**  
**Visual Inspection**  
**Non-Destructive Testing**  
**Class designation**  
**Hydrostatic testing**

**Pigging for Cleaning and Monitoring**  
**Types of Pigs**  
**Monitoring Internal Corrosion**  
**Pipe Repair**

**Buried pipelines.**  
**Corrosion and Cathodic Protection**  
**Pipe Coating**

**Stress Analysis**  
**Flexibility Analysis Methods**  
**Flexibility Analysis Demonstration**  
**Equipment Load Limits**  
**Cold Spring**  
**Elastic Follow-up**  
**Fluid Service Requirements**

**NOTE:**

**Pre & Post Tests will be conducted.**

**Case Studies, Group Exercises, Group Discussions, Last Day Reviews and assessments will be carried out.**
