Define Management Consultancy & Training Certificate of course completion will be issued to all attendees.

TRAINING OVERVIEW

TRAINING DESCRIPTION

Managers and decision makers are introduced to, regularly, many training programs. It is easy to make sound decisions when the training is related to defined, agreed upon, and measurable skills (HARD SKILLS) such as operating machines or applying a recognized procedure. It is very difficult, however, to take decisions when the training relates to skills that have no recognized and measurable standards (SOFT SKILLS), such as communications, or leadership. The secret for taking the correct decision depends totally on the quality of analysis that leads to detecting the training and development needs for the working individuals, for supporting the organization’s needs, wants and desires.

Participants will learn the skills that will allow them to correctly, analyze training and developmental needs through better understanding of analytical skills, performance improvement, and organization development concepts and practices.

TRAINING OBJECTIVES: www.definettraining.com

At the end of the session the participants should be able to identify the suitable training requirements of candidates (staff) to meet the expected or required level of competency to perform effectively and efficiently in their job role.

TRAINING METHODOLOGY

A highly interactive combination of lecture and discussion sessions will be managed to maximize the amount and quality of information, knowledge and experience transfer. The sessions will start by raising the most relevant questions and motivate everybody to find the right answers. The attendants will also be encouraged to raise more of their own questions and to share developing the right answers using their own analysis and experience.

All attendees receive a course manual as a reference.

DMCT/OL/9/18(Rev3Dt:23/9/18)
